DETAILED ACTION

This Office action is in response to the application filed August 18, 2003

1. The rejection under 35 U.S.C. 103(a) as being unpatentable over SHIOTA et al. is withdrawn in view of the declaration under Rule 132 which demonstrates unexpected results with respect to the example in SHIOTA et al '833.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 2, 4, 6, 8-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by SHIOTA et al 6,190,833.

The claimed invention is drawn to the following:

Art Unit: 1752

- 1. A negative resist composition comprising:
- (A) an alkali-soluble resin;

(B-1) a cross-linking agent capable of cross-linking with the alkali-soluble resin (A) by the action of an acid, in which the cross-linking agent is a phenol compound containing: in the molecule one or more benzene rings; and at least two cross-linking groups bonded to any of the benzene rings, the cross-linking group being a group selected from the group consisting of a hydroxymethyl group, an alkoxymethyl group and an acyloxymethyl group;

(B-2) a cross-linking agent capable of cross-linking with the alkali-soluble resin (A) by the action of an acid, in which the cross-linking agent contains at least two groups selected from the groups represented by the following formula (1) and represented by the following formula (2); and

(C) a compound capable of generating an acid upon irradiation with an actinic ray or radiation:

$$CH_2-O-R_4$$
 $-N$
 CH_2-O-R_5
(2)

wherein R_3 represents a hydrogen atom, an alkyl group, or an

alkylcarbonyl group; R_4 and R_5 each represent a hydrogen atom, an alkyl group or an alkylcarbonyl group.

SHIOTA et al discloses a radiation sensitive resin composition comprising a phenol resin, an amino resin, a compound having two or more crosslinking groups in a molecule, and a

Art Unit: 1752

halomethyl-1,3,5-triazine compound, see <u>column 3</u>, <u>lines 1-10 and claim 1 in column 25</u>, <u>line 54</u>

<u>- column 27</u>, <u>line 10</u>. The specific ingredients as recited are in <u>column 22</u>, <u>lines 1-63</u>, wherein

A1 - A4 in <u>lines 3-15</u> disclose the claimed alkali soluble resin, while B1- B3 in <u>column 22</u>, <u>lines 16-25</u> meet the claimed ingredient (B-2) and C1-C3 meet claimed ingredient (B-1) recited above.

Example 6 of Table 1 in column 23/24, lines 1-18 anticipates the claimed invention wherein each of the claimed ingredients to an alkali-soluble resin, a crosslinking agent (B-1) and (B-2) and a compound which generates an acid (C) are met by Example 6 comprising A3, B2 and C2. These ingredients are defined in column 22, lines 1-63.

The arguments by applicant have been carefully considered, however the 35 U.S.C.

102(b) over SHIOTA et al remains in view of the Example 4 of Table 1. The component

disclosed in SHIOTA et al '833 of Example 4 described as C4 meets the claimed ingredient of

B-1 and the disclosed component B1 of SHIOTA et al '833 meets the claimed ingredient of B-2.

The rejection is repeated.

4. Claims 4 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the prior art references disclose the claimed repeating units in a resin recited in claim 4 used in a negative working composition comprising the claimed ingredients (A), (B-1), (B-2) and (C).

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Chu whose telephone number is (571) 272-1329. The examiner can normally be reached on Monday - Friday from 9:30 am to 6:00 pm.

The fax phone number for the USPTO is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-1700.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PMR only.
